

Your TV & NUCCA

Did you know that statistics show that over 99% of US homes have a TV. But most of us don't understand exactly how our TV works. Push a button and the picture comes on. You don't know how it gets in there, but it works. The fact that you don't know how it works doesn't stop you from using it.

NUCCA WORKS. Just because you haven't heard about NUCCA or don't know how it works doesn't mean it won't work for you! The study of Spinal Anatomy, Biomechanics, X-ray physics are not a requirement to feeling better. The study of radio waves, electricity, lenses, and plasma screens are not a requirement for you to enjoy HD TV, but it's great to have! This procedure takes a great knowledge base and puts it into a package you can feel good about. We need to RAISE THE BAR in Health care. NUCCA has been researched over 40 years, is studied by professionals who have doctoral level educations and is so technical in its study and application that there are only 300 people in the **world** practicing it today. This, Like HD TV should not keep you from its benefits and enjoyment.

NUCCA works. It's custom designed to you to allow you to properly function mechanically. The end result of proper function is less pain and a body that lasts longer. Don't stay in pain just because you don't understand it. That would mean you couldn't drive your car or watch your TV either. Call today and let us help you stop your pain. You deserve to feel better.

We are talking about the quality of your life, work, and relationships. Don't let hesitation and doubt steal your hope of feeling better. Just read the real testimonials from people just like you. Don't give up!!

Our Patients Speak Out

"He told me to make an appointment. I did and don't regret it at all. I was skeptical, but whatever it is Dr. Matt does, it works. I am pretty much headache free!! I now have a headache only one day a month, at the beginning of my cycle." Lori S - Oakley KS

"I was very skeptical when I first learned about NUCCA because Chiropractors had been a regular part of my life for about 12 years. It seemed regular Chiropractic just didn't "last". ... No more. My headaches are completely gone. My back feels great!" Kay S - Fort Collins, CO

"At first I was hesitant to try or even believe how it could help. How could you get adjusted and your back feel better without cracking it? I decided to try it and I am glad I did. During my first adjustment it almost felt like blood was flowing in my back again. There was a tremendous release of pressure and almost a tingling sensation throughout my whole back. I've been able to hold my adjustments longer than the traditional care." Jodi P. - Greeley, Colorado

"Since the very first visit, my life is so much better. I can stand straight, walk further than I have in a long time, and stand in one place with no pain. Most of all, I don't have to lean on the shopping cart to get around the store! To all those who are so skeptical, "if you haven't tried it, don't knock it! It works!" Arloa H - Laramie WY

"When I first went to Precision Spinal Care, I was apprehensive. With the first treatment I noticed a great improvement in my neck, and my back felt much better. After three treatments, there was a marked improvement in my back!! I could move in ways I hadn't for a long time. Now I can go three weeks between treatments. What a miracle!!" Beverly R - Cheyenne, WY

"The NUCCA treatment has helped me in many ways. I used to have a very sharp back pain, and many severe headaches. Whenever I get adjusted, it makes me feel much better! It's hard to believe so little treatment can make such a difference! It works!" Reuben E-Loveland, CO

*Could this be a Hoax?
Can they really do this?*

A what??? A Refund?

No, Yes and Absolutely. You read this correctly and you don't need an eye exam. Last year we were happy to write out 12 checks between both doctors. If you turn that alone into a customer satisfaction rating, it would rate over 95%!! Can you say that about your doctor / chiropractor / dentist / orthopedic surgeon or any other form of provider you have tried? Even people who received their checks have referred their friends or family to us because they said, "Why not try it. You've got nothing to lose."

We trust you and this allows you to trust us. This is a way that prevents either of us from getting into a relationship where the other feels taken advantage of. We will work as hard as we can, customizing our care just for you, to maximize your wellness and healing. If you don't think we did our job, just ask for your money back. Nothing complicated about it.

Why? Simply put, our office system doesn't make a lot of sense unless you understand all sorts of technical biomechanics, physics..... That could stop anyone right there. So even if our procedures don't make sense to you, they work! And through this guarantee, we want you to trust us & try NUCCA - RISK FREE!

Belief in our guarantee doesn't make this offer any less real, valid or law binding.

Precision Spinal Care is dedicated to raising the bar to new levels of health and care. Please read more about it. What we have done is something that would probably close your doctors practice.

GUARANTEE BOND

Certificate of Satisfaction

No one can guarantee 100% results, but we want you to be satisfied that we will do everything we can to help you. If after **30-DAYS**, you become unhappy with your decision to visit our office, we will unconditionally refund **ALL** the money you have paid us for services rendered, and make other care recommendations.

1. Payment in full must be made at the time of each service.
2. Patient must follow doctors recommendations to their best abilities to achieve maximum benefits and results.
3. Any refunds will be reimbursed from Precision Spinal Care, LLC by the following:
 - a. Credit card refunds will be issued ASAP in 1 to 3 business days.
 - b. For non-credit card orders, funds must clear with our bank before a refund can be issued. In rare cases, this may take a week or two. It is important for us to take care of our end of the contract in an expeditious manner.
4. Refunds must be asked for by 30 days from the initial date of service.
5. If further service is continued beyond 30 days and no refund is asked, this contract is breeched and no guarantee will be awarded.

(Testimonials Continued) “Mom called one day and said that she had heard a radio ad for a program that she was very interested in. I went online and got all the information for her. She was interested, I was skeptical, but at this point, anything was worth a try. Upon hearing that my cousin-in-law knew of people here in town that had the treatments and were very pleased with them, we decided to make mom an appointment. I have to say that I was ready to take her back home when this “high school looking young man” was introduced as the doctor. I was concerned about his hurting her as I have heard horror tales about chiropractors form others. He pressed his finger against my hand and told me that was the amount of pressure he would be using. Ok, I felt a little better yet. Then we went into his treatment room, looked at the very short treatment table and felt anxious again as I wondered how we would get mom up and down comfortably. While we were waiting our turn, we heard everyone in the waiting room say how much better they felt following treatments, and when we left the office the first time, we met a nice young family who had traveled from Nebraska to see the doctor. Following the final treatment that day, mom stat up and stood straight up from the low sitting position much to my astonishment. Her gait was drastically improved immediately. She has continued seeing him and we can’t keep her down! She goes through her large house and yard like a terror now!” Carol H-Laramie, WY

“A friend told me about NUCCA. Well, I was very skeptical at first, but then the thought of having no pain won over my skepticism. After my first treatment, I had no neck pain what so ever. I rested for 15 minutes and then went back in for my second treatment. My back pain and the pain in my leg were gone and for the first time in years I was able to lie down and sit up by myself. I could kneel on the floor and get up with no help; it was the most wonderful feeling.” Connie F - Louisiana

“During the past 15 years I have broken my back in three different areas on three different accidents that resulted in very limited neck movement, not being able to lift my arms up for any length of time without making them numb and achy and sitting in one position for any length of time made my legs numb and hard to walk on. I have been to one of the best back specialists in Colorado and was informed that there was nothing they could do without severe complications and that I would just have to live it. One orthopedic surgeon wanted to sign my disability papers for me. Following the first treatment I was driving back to Laramie, WY and went to turn around to speak to my mom in the back seat when I suddenly realized that I had turned just my head around, and not my whole upper body to look at her. What a surprise!! Also my legs did not go to sleep on me when I got home as they usually did. I still can’t believe that the gentle manner in which NUCCA provides treatment can do so much.” David H - rural WY

“Skeptic is my first name, my father being a physician. But like anyone in chronic disabling pain, you desperately search for answers and a cure. To my rational mind, I didn’t see how adjusting my neck could affect my lower back, physics or not. But, after four surgeries all aimed to alleviate the chronic and often severe lower back pain, and years of physical therapy, a decade of disability I decided to give it a try, Am I cured? No, not totally but most of the time I am pain free and I am able to get back some of the life I’d given up. That’s huge! Jennifer K—Fort Collins
